SEED CERTIFICATION AGENCY (SCA) Utah Crop Improvement Association 4855 Old Main Hill Utah State University Logan UT 84322-4855 Phone: (435) 797-2082	**Certified Seed** **SITE IDENTIFICATION LOG, PART 1** **for Wildland Collected Material Intended for Direct Sale and Revegetation Outplanting**

Inspection Fee[1] _____ Field Lot #[2] _____ Appl/Cert. # _____
$50 minimum — Assigned by SCA

Collector[3] _____ Address _____

Phone/Cell _____ Permit/Contract/Permission[4] Public ☐ Private ☐

Species Name _____ Common Name _____

Germplasm ID[5] _____ Material Collected _____ Amount _____
e.g., seed, cuttings, etc. — Bulk lb or volume

Species as Collected Indigenous to: ☐ Site ☐ County ☐ State ☐ Nonindigenous ☐ Unknown

Germplasm Category ☐ Source Identified ☐ Selected ☐ Tested ☐ Variety

Date(s) Collected _____ State _____ County _____ Elevation _____

Site Size/GPS[6] _____

Site Description/Map[6] _____

I attest that all above information is correct _____ Date _____
Signature of Collector

Uncleaned Sample Taken By[7] _____ Plant Specimen Provided by[8] _____

Site Inspection Completed _____ Date _____
Signature of SCA Representative

Conditioner Lot # _____ Date(s) Conditioned _____ Clean Seed Lb _____

I attest to the best of my knowledge, all above information is correct.

_____ Date _____
Signature of Seed Broker/Conditioner

Seed Analysis? _____ # Tags _____ Approved[9] _____
If Yes, List Seed Sampler and Lab — Date, Initials of SCA Rep.

---

1 Time/mileage charges may apply where special verification procedures are requested by a seed buyer or are judged necessary by the SCA.

2 The collector or seed broker/conditioner must a) label all bags or containers with a field lot #, b) store so each field lot can be easily inspected, and c) blend field lots only by permission of SCA rep.

3 Major collector of material from this site. This form may be filled out by the major collector or by the Broker/Conditioner receiving the material, but in any case information must be correlated with the appropriate Pre-Collection form and applicant. List additional collector groups on a Site Inspection Log, Part 1 Addendum. ($10 fee for each group).

4 Attach copy(s) of permits, contracts, or permission forms or letters. Field bulk pounds collected on public lands not covered by applicable documents will not be eligible for tagging by the SCA.

5 Variety name if applicable, or enter a germplasm identification (site name or number) if one is given by the collector or public or private germplasm developer (e.g. Gold Strike variety or Nugget Gulch germplasm bluebunch wheatgrass).

6 List specific sizes/description for areas actually collected in relation to approximation given on Pre-Collection Application. For example, list GPS reading from the approximate center of contiguous stands listed in acres, a minimum of four GPS readings representing the perimeter of contiguous stands listed in square miles, and/or attach a topographic map with a combination of GPS reading(s) and lines drawn that sufficiently locate contiguous or non-contiguous stands over applicable geographic areas within a county. This information is confidential.

7 An uncleaned sample of seed collected must be filed with this log to represent each field lot. Specify whether taken by the collector, seed broker/conditioner, or SCA Rep. A manila envelope (at least 5" x 9") or plastic bag (if material is dry) containing the sample must be marked with the field lot #.

8 A pressed, dried plant specimen must be filed with this log to aid in identification of many species, especially forbs and some grasses. Contact the certification agency for a list of species requiring a plant specimen to complete this form. Specify whether specimen is taken by the collector or SCA Rep.; a fee surcharge may apply if specimen is provided by SCA.

9 Certification tags (Source Identified, Selected, or Tested) for wildland collected seed are issued on the basis of source and genetic identity and purity only. Purity and viability analysis and labeling is the sole responsibility of the vendor unless specific requests or contracts require sampling or mechanical standards oversight by the SCA.

Original to Certification Agency • **Photocopy** for Seed Broker/Conditioner/Collector Records
